About Our Company

Founded with local, small-town roots, All Out Drilling is Saskatchewan's premier water well drilling company.

The journey for All Out Water Well Services & Drilling LTD. began in the early months of 2016 when two brothers and their close family friend started drilling water wells locally in their community of Biggar, Saskatchewan. With their previous experience in the oil industry, this new venture was the perfect fit. All Out Drilling has since grown to become one of Saskatchewan's top drilling companies. They proudly drill and provide services for communities, farms, lakes, and families across their beautiful province. In 2020 and 2021, the company saw huge growth, despite pandemic conditions, and is now pushing forward for 2022 with a more robust digital approach to engage with and support their growing customer base.

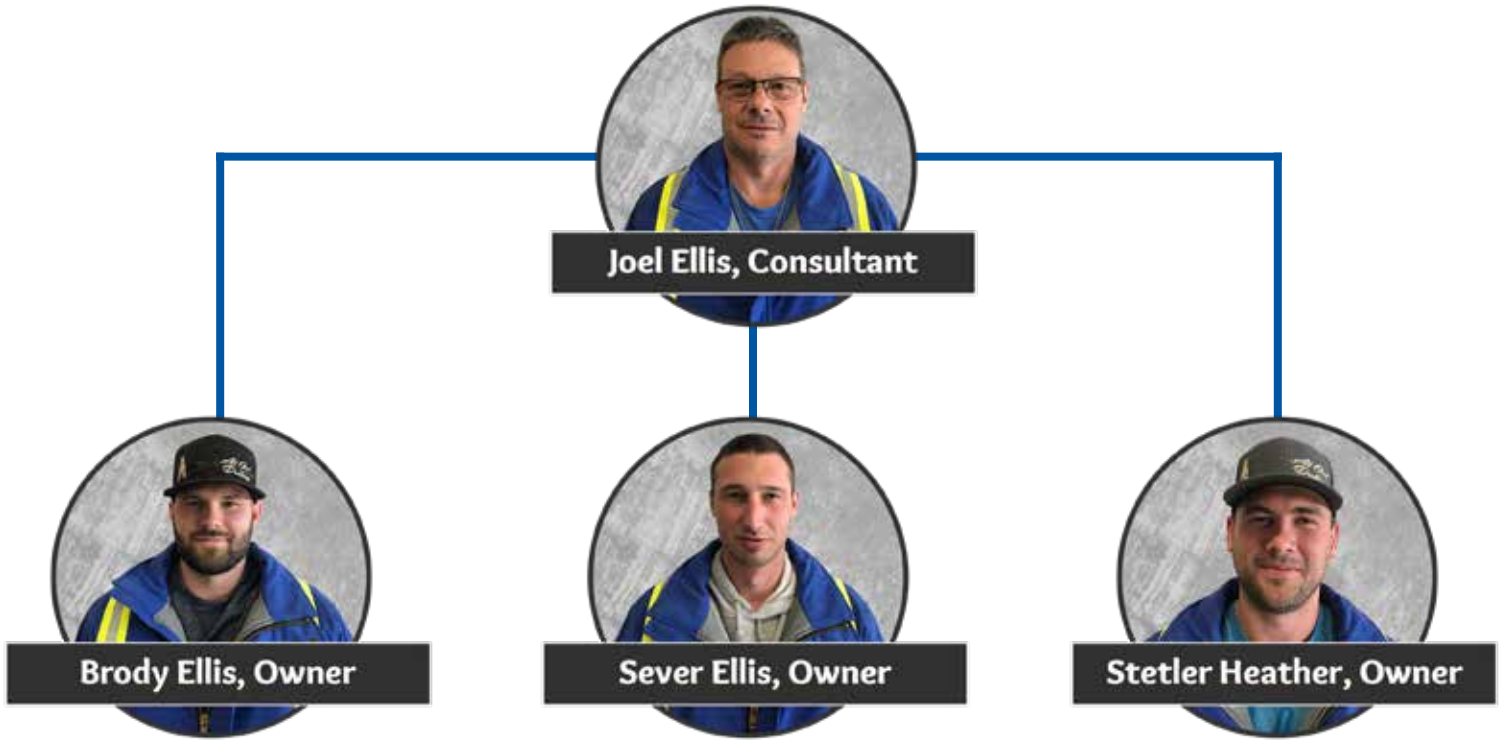

We are fully registered, licensed, and insured in the province of Saskatchewan

We back all of our work and services with a strong 5-year warranty

Management Team

All Out Drilling's management team consists of 3 company owners and a drilling consultant. Joel brings 35+ years of knowledge and experience in the drilling industry to the company and is proud to help build the All Out Drilling team.

Our Story

All Out Water Well Services & Drilling is a privately owned and operated drilling company based in central Canada. Our business has been successfully operating with top safety ratings and no reported injuries. Our company's project completion count is high, varying from smaller residential and lake wells to designing and installing high production, commercial wells and water treatment facilities. As a proud Saskatchewan company, we always strive to be the premier choice in this industry. We are highlighted with a strong reputation, knowledgeable team, notable productivity throughout our company, and a foundation built around safety.

Furthermore, our team at All Out Drilling has recently welcomed a new drilling consultant, Joel Ellis, to our ranks. Joel adds 35 years of experience in the oil and gas industry to our portfolio. He has worked worldwide, including Saudi Arabia in the Middle East, Ellesmere Island in the High Eastern Arctic, and many places in between. His last ten years have been spent working in the Bakken Oil Field (USA) gas wells. He has profound knowledge of all types of wells, their depths, and different problems that can occur when drilling anywhere from 100ft to 25,000ft. He is also very familiar with the challenges present when working in extreme or isolated conditions. Joel is an invaluable asset to our team that pushes us to new heights while ensuring top-quality work.

Where We Work

Our drilling crews can be seen drilling across this beautiful Saskatchewan province. We're Local to the bone, but always expanding our reach.

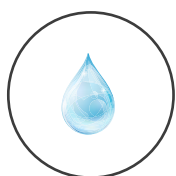

We've got experienced teams of water well drillers servicing this great province. From the urban communities of Saskatoon and Regina to the rural communities surrounding them and even the northern homes and cabins, we've got you covered. Here are some of the communities we're proud to serve:

- ✓ Biggar & Area (Our Hometown)
- ✓ Battlefords
- ✓ Kindersley
- ✓ Lake Diefenbaker
- ✓ Lloydminster
- ✓ Meadow Lake
- ✓ Prince Albert & Northern Lakes
- ✓ Regina
- ✓ Saskatoon
- ✓ Swift Current

Rig #2

Gefco CF15 Kelly Drive Mud Rotary Drilling Rig

Mounted on International Paystar, Maximum drill depth up to 1500ft ranging from 4-3/4" - 17.5" bore holes. 5.5 x 8 GD duplex mud pump & IR compressor. Designed to drill with both mud rotary and compressed air.

Rig #3

Failing 1250 Hole Master Mud Rotary Drilling Rig

Mounted on GMC 5500 HD, Maximum drill depth 1000ft ranging from 4-3/4" - 13 1/4" bore hole. 5 x 6 GD Duplex mud pump & 265 Leroy Compressor. Designed with both mud rotary and compressed air.

Rig #4

Failing 1250 Hole Master Mud Rotary Drilling Rig

Mounted on a Heavy Spec Kenworth - maximum drill depth 1000ft ranging from 4-3/4" - 13 1/4" bore hole. 5 x 6 GD Duplex mud pump & Compressor. Designed with both mud rotary and compressed air.

Mobile Drill

B-40 Mounted on GMC 5500

2-8" flighting, 150-200ft drill depth depending on ground conditions. Also available on tracks.

Ford L9000

Tandem Support & Water Truck (x3)

Flat top tank, 2500gal water capacity, Honda 3" transfer pump.

Equipment (cont.)

You can find a more detailed and frequently updated list of our equipment on the services page of our website.

JT 25 Ditch Witch

2018 & 2020

Directional drill with 400m horizontal range. Equipped with all locating tooling.

Excavator

2020

John Deere 60G long-arm rubber tracked excavator. Used to assist in drilling operations, well decommissions, and trenching.

Service Rigs

2011

22ft derrick with single line 12,000lb winch. Hydraulic deck reel capable of handling 1500ft of 1" poly hose.

Assorted Trailers

Flat deck trailers, dump trailers, and more. Used for various equipment transport and on-site material hauling.

Pump Testing

Various pump and well testing equipment including: flow meters, well divers, down-hole bore cameras, etc.

Miscellaneous

Chem grout plant, boiler/steam unit, mud recycling unit, welders, generators, light towers, and much more.

Client Satisfaction

We work hard to ensure each client is left feeling satisfied with the work we have done. Here's some of the praise they've given our company.

"The All Out Drilling crew went over and above our expectations from the first phone call. They helped me through the decision making process on what to do with the situation we had on our hands. From the first phone call they had a crew at our place within 48hrs. Drilled and completed the new water well with no issues - professional and efficient, 5-star review.

Terry Osler

Well Decommission
Meadow Lake

"All Out Water Well Services & Drilling supplied a courteous, safe, and professional service when drilling a well on my home quarter. A 400-ft well was drilled, cased, and operational within 48 hrs.

Shane Cockle

New Farm Well
Biggar

"All Out Water Well Services & Drilling did a great job. Professional crew & left the site neat and tidy. Assisted with the paperwork required to qualify for the Government decommissioning rebate, which was a huge help! Highly recommended!

Ron Davies

New Farm Well
Lloydminster
